ICRD INDUSTRIES

ICRD User/Administrator Manual

Christopher Dizon, Edmond Lau, Raja Tahir

April 8, 2014

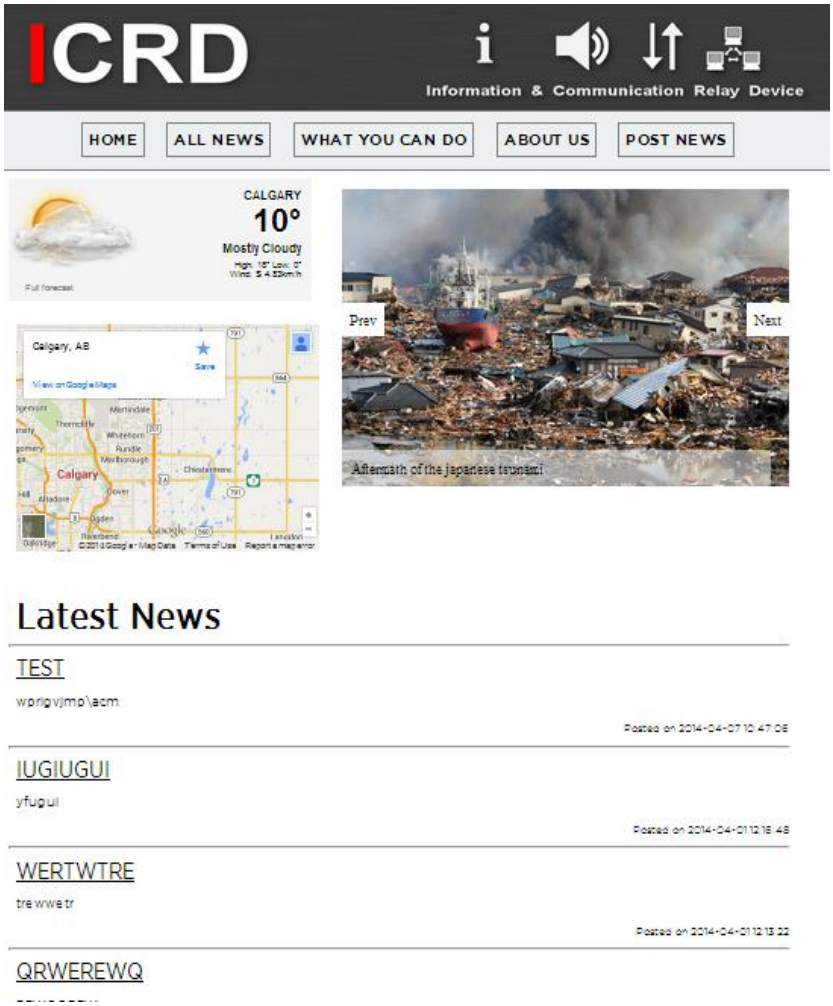
User Manual

Required Items:

- Terminal Computer: Laptop/desktop computer to access the website
- Internet/Web browser

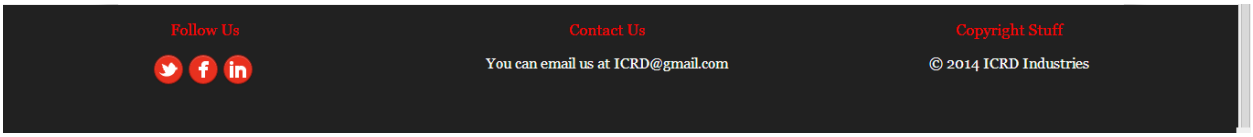
How to use:

- Power on your terminal computer and navigate to www.icrdindustries.com
- You will be brought to the “home page” which lists the current weather, a map of your location, current photos of disasters happening, and the top 5 current news items submitted by employees.

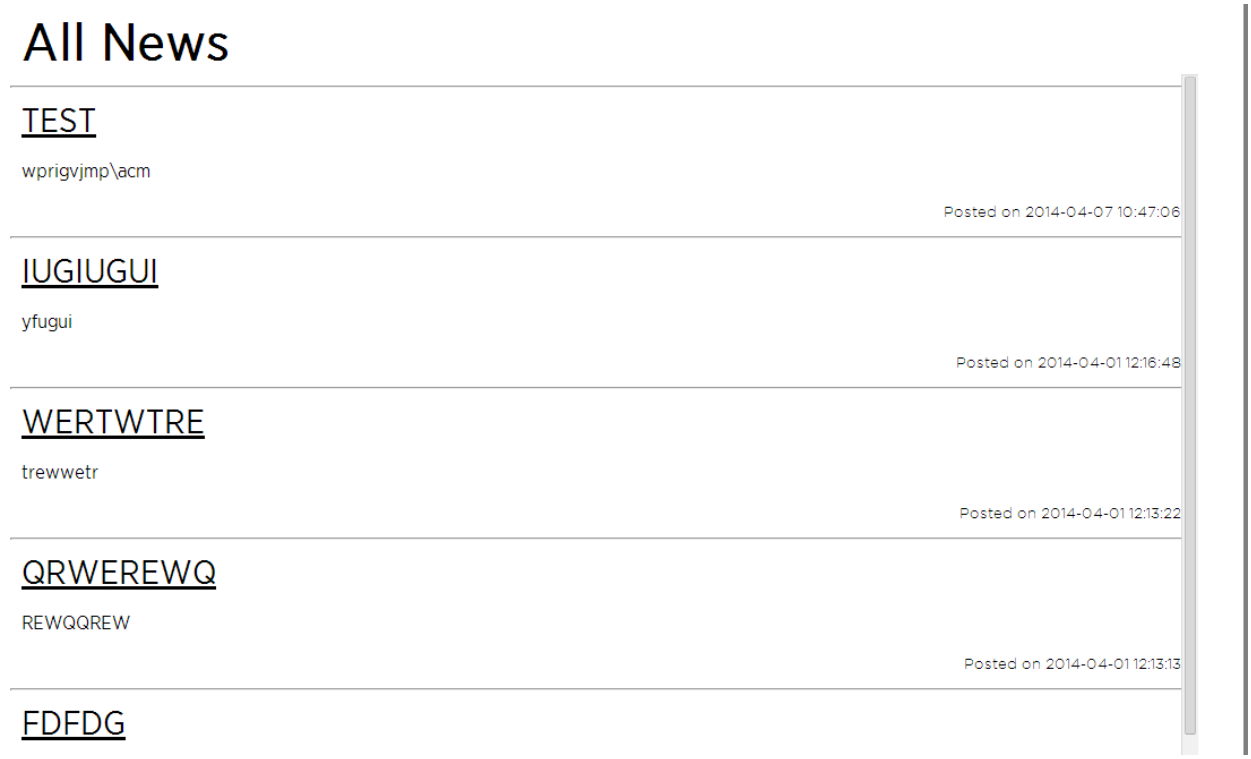


- At the top of the page you will find our navigation menu which can take you to “all news items posted”, “what you can do to help”, “about us” and “post news pages”

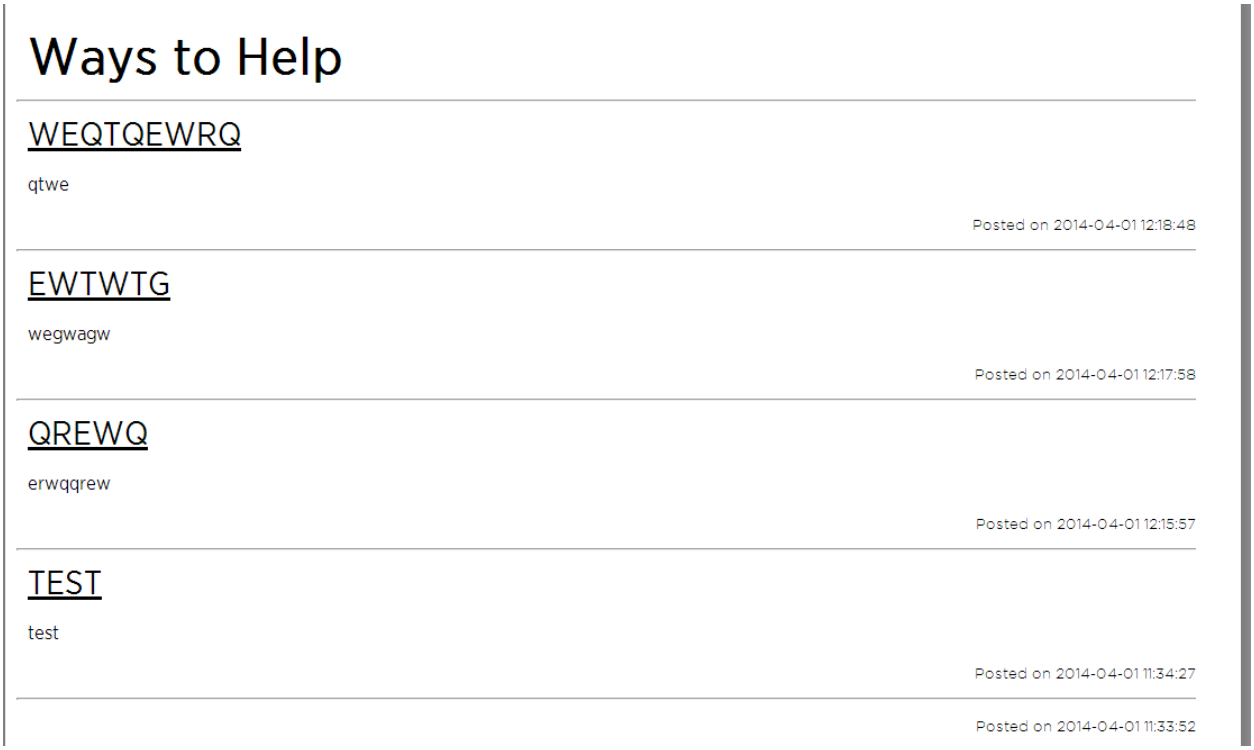
-At the bottom of each page you will see our contact information and links to our social media pages.



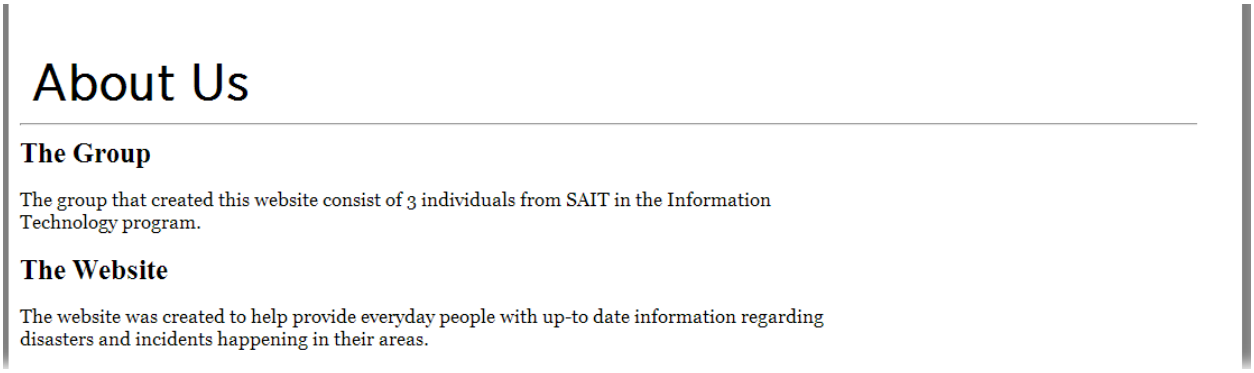
-If you click on All News, you will be brought to our main content page. This page contains every item ever posted with the most current items on top.



- If you click on “What You Can Do”, you will be brought to the page where you will find all the information on what you can do for certain disasters such as ways to help, ways to stay safe etc.



-If you click on “About Us”, you will be brought to the page which explains a little about the group that created the website and what the main purpose of the website is.



About Us
The Group
The group that created this website consist of 3 individuals from SAIT in the Information Technology program.
The Website
The website was created to help provide everyday people with up-to date information regarding disasters and incidents happening in their areas.

-If you click on “Post News”, you will be brought to our login page which allows ICRD employees to log in and post up to date news to the site.
